

ELECTRICAL ASSEMBLIES

Vermillion provides a turn key solution to your electrical and electromechanical assembly requirements. Our team supports box builds, SIL and custom assembly manufacturing. Our laser focused attention to detail ensures that you receive the highest quality products each and every time. Our team can support all phases of your project from design to prototype all the way through full rate production.

Vermillion supports design, prototype and small rate production out of our Wichita, Kansas facility and full rate production from our Guaymas, Senora, Mexico facility. Both of our facilities are ISO9001/AS9100 certified and ITAR registered. Our capabilities include electronic and electromechanical assemblies, custom box assemblies, consoles, cabinets, enclosures and rack mount systems.

The Vermillion team has experience in both simple and complex builds and we excel in providing additional design and manufacturing support.
